

TRANSPORTATION TRENCH BACKFILL COMPACTION FORM

(to be completed for excavation reinstatement)

As per the National Code of Practice for Utility Operators, sections 5.5.4 and 5.5.5

Clegg Hammer testing is required for Carriageway Basecourse and Sub-base layers, Driveways and Footpaths prior to surfacing.

The target results are:

Carriageway Basecourse	CIV 40
Carriageway Sub-base or Driveways	CIV 35
Footpaths	CIV 25

Where the excavated area is greater than 0.5m² and less than 5m², one test is required, or for larger excavations, one test per 5m². For backfilling within the carriageway, testing must be carried out for each backfilled layer.
